Housing Not War Declaration (for organizations)

We support the demand that the federal government implement a Housing Not War strategy. Canada is at war in Afghanistan. Homelessness remains a national disaster in Canada. Canadian troops should come home, and funding directed towards war and militarism should go towards housing and other peaceful purposes.

As homelessness worsens in Canada, the federal government can no longer justify spending untold billions of dollars on war. We call for the 1% solution – an additional 1% of the federal budget to be allocated towards social housing. This would bring spending to \$4 billion per year.
